ACADEMIC PROJECTS

SCRUM Master for Senior Design Project - Natural Language Processing for Naval Messages (NLP4NM): Organized weekly team meetings and assisted in the development of front-end site utilizing Flask, JavaScript, HTML, and SQLite. Composed SCRUM reports and ensured team followed deadlines and stayed on task.

Laboratory Assignments, Junior Year: Completed weekly coding assignments in C, including problems in forking, message queues and semaphores. Obtained a perfect score (100/100) on every assignment.

Procedural Programming Assignments, Sophomore Year: Completed biweekly rigorous assignments in C. Included both iterative and recursive programming as well as array sorting and use of constructs. Was able to skip final exam due to exceptional class grades.

2D Platformer Game, Freshman Year: Successfully lead a team to create a 2D sprite-based game. Delegated tasks for each team member and combined everyone's efforts into the final product: Grade: A.
